

Aquatic Safety & Risk Management Services and Programs

Training Professional Lifeguards is only the beginning of the valuable services offered by Jeff Ellis & Associates, Inc. We provide services and programs to meet a full range of the aquatic industry needs for safety and risk management.

Aquatic Safety System Design & Consulting Services

- Review of construction plans for aquatic facilities and waterpark attractions for aquatic safety
- Design of aquatic safety protection systems
- Evaluation of aquatic facility site plans for safety and risk management recommendations
- Consultation to address aquatic safety and risk management issues

Aquatic Facility/Attraction Inspections

- Onsite safety inspections of aquatic facilities and attractions using custom-designed criteria based upon applicable industry standards
- Due Diligence Attraction Testing for new aquatic attractions and slides

Aquatic Accident Investigations

We provide an expert source of independent, unbiased, and proactive accident investigations. Our experts determine the proximate cause of accidents while developing and securing critical evidence to aid in defense of our clients. Since 1983, our staff associates have investigated more than 800 aquatic accidents.

Litigation Support/Expert Witnessing

E&A is regarded as the industry leader for aquatic litigation support services. Our litigation track record in successfully aiding the defense of our clients remains unmatched in the industry.

International Lifeguard Training Program™ (ILTP™)

- Comprehensive Lifeguard Training Program provides an objective driven, performance based experiential training program.
- All in one curriculum includes Professional Rescuer CPR/FA/AED and oxygen administration

Water Safety Plus Training Program

- Designed for non-lifeguards working in an aquatic environment.
- Training provides skills and knowledge to train non-lifeguards as Supplemental responders to work in a team concept with other lifeguards in the event of emergency incidents.
